CAREER OBJECTIVE

Final-year Computer Science student passionate about backend engineering, aiming to apply my knowledge of REST API design, database optimization, and software engineering principles to build robust systems and contribute to organizational growth.

EDUCATION

Vardhaman College of Engineering

Bachelor of Technology in Computer Science and Engineering — CGPA: 9.32

Hyderabad, Telangana

2023 – 2027

Resonance Junior College

Board of Intermediate Education (TGBIE) — Percentage: 98.2%

Telangana, India

2021 – 2023

Dr KKR's Gowtham School

Board of Secondary Education (SSC) — CGPA: 10.0

Telangana, India

2021

EXPERIENCE

Infosys Springboard Virtual Internship

February 2026 – March 2026

Python Programming Intern

Remote

- Completed structured training in Python programming and problem-solving
- Worked on hands-on exercises and assignments to strengthen programming fundamentals and logical thinking
- Improved understanding of debugging techniques and problem-solving approaches

PROJECTS

E-commerce Platform – Product & Category Management System

Java, Spring Boot, Spring Security, PostgreSQL, JWT, REST APIs

- Implemented JWT token-based authentication with Spring Security filters for secure user access and role-based authorization
- Built 8+ REST API endpoints for product and category management with layered architecture (Controller → Service → Repository) and comprehensive exception handling

CineTrack – Movie Watchlist & Review System | *Java, Spring Boot, JPA/Hibernate, PostgreSQL, REST API*

- Designed and implemented 4 interconnected JPA entities with complex relationships (OneToMany,ManyToOne, OneToOne) with 31+ REST API endpoints for complete CRUD operations
- Developed layered architecture (Controller → Service → Repository) with comprehensive business logic validation, global exception handling, and DTOs to prevent circular JSON references

URL Shortener with Analytics | *Java, Spring Boot, Spring Security, JWT, PostgreSQL*

- Built a full URL shortening service with Base62-encoded short codes, custom aliases, and TTL-based link expiry, exposing 6+ REST endpoints across auth, URL, and analytics modules
- Implemented stateless JWT authentication with Spring Security and per-URL click analytics (total clicks + daily breakdown), using HTTP 302 redirects to guarantee accurate tracking
- Designed a 4-table relational schema (users, short_urls, click_events, rate_limit_log) with indexed lookups and transactional click-count updates; containerized the app with Docker for deployment

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Databases: PostgreSQL

Developer Tools: Git, GitHub

Core Concepts: Data Structures & Algorithms, DBMS, OOPs

Backend Frameworks: Spring Boot, Spring Data JPA, Spring Security, JDBC

CERTIFICATIONS

Python Foundation Certification (2025)

Programming Using Java (2025)

Smart Coder – Data Structures & Algorithms (DSA) — Smart Interviews (2026)
