CAREER OBJECTIVE

Backend Software Engineer seeking entry-level or internship roles to design scalable, high-performance REST APIs and backend systems. Passionate about Java, database optimization, and applying solid software engineering principles to solve real-world problems.

EDUCATION

Vardhaman College of Engineering <i>Bachelor of Technology in Computer Science and Engineering — CGPA: 9.32</i>	Hyderabad, Telangana 2023 – 2027
Resonance Junior College <i>Board of Intermediate Education (TGBIE) — Percentage: 98.2%</i>	Telangana, India 2021 – 2023
Dr KKR's Gowtham School <i>Board of Secondary Education (SSC) — CGPA: 10.0</i>	Telangana, India 2021

EXPERIENCE

Infosys Springboard Virtual Internship <i>Python Programming Intern</i>	February 2026 – March 2026 <i>Remote</i>
- Completed structured training in Python programming and problem-solving - Worked on hands-on exercises and assignments to strengthen programming fundamentals and logical thinking - Improved understanding of debugging techniques and problem-solving approaches	

PROJECTS

CineTrack – Movie Watchlist & Review System <i>Java, Spring Boot, JPA/Hibernate, PostgreSQL, REST API</i>
- Designed and implemented 4 interconnected JPA entities with complex relationships (OneToMany, ManyToOne, ManyToMany, OneToOne) with 31+ REST API endpoints for complete CRUD operations - Developed layered architecture (Controller → Service → Repository) with comprehensive business logic validation, global exception handling, and DTOs to prevent circular JSON references - Created custom repository queries with Spring Data JPA for advanced filtering (movies by genre/year, reviews by rating, users by name/email)
Banking System – Transaction Management & ACID Compliance <i>Java, JDBC, PostgreSQL, OOP</i>
- Architected a multi-account banking system implementing ACID transaction properties with automatic commit/rollback for debit, credit, and fund transfer operations - Implemented comprehensive input validation including PIN verification, balance checks, negative amount detection, and transaction failure handling - Demonstrated JDBC best practices using prepared statements for SQL injection prevention and transaction isolation handling

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Databases: PostgreSQL
Web Development: HTML, CSS, JavaScript
Developer Tools: Git, GitHub, Maven
Core Concepts: Data Structures & Algorithms, DBMS, OOPs
Backend Frameworks: Spring Boot, Spring Data JPA, JDBC

CERTIFICATIONS

Python Foundation Certification (2025)
Programming Using Java (2025)
Google Cloud Fundamentals: Core Infrastructure (2025)
Smart Coder – Data Structures & Algorithms (DSA) — Smart Interviews (2026)
